Script for Bobcat 3-wheel and 4-wheel Compact Travel Scooter

Some powered mobility devices can be cumbersome to maneuver or transport.

This is why Drive Medical developed their 3 and 4-wheeled Bobcat Compact Scooter.

Lightweight and user-friendly, the Bobcat enables drivers up to 250 lbs to safely and efficiently navigate narrow or crowded areas.

Such agility allows individuals to maintain—and even expand—their mobile independence, both indoor and outdoors.

T-shaped handlebars and a protected forward and reverse thumb lever makes driving easy—even for those with limited dexterity.

The handlebar column's height and angle adjusts to provide a more comfortable grip. To adjust, simply loosen this lever to the most suitable position, then tightens it to secure the tiller.

The comfortable seat and flip back armrests are also height adjustable to best fit the driver.

The solid tires on both the 3 and 4-wheeled models won't go flat or leave marks on indoor surfaces. And anti-tip wheels ensure safe, worry-free travel.

Transporting the scooter is also easy. It disassembles without the use of tools into 4, lightweight pieces that conveniently fit into the back seat or trunk of a car. And once you've reached your destination, reassembly can be done in minutes.

When compact, convenient powered mobility is needed, Drive Medical's 3 or 4-wheeled Bobcat scooter is the right direction—for the road ahead.
