Procedure For USB Firmware Upgrade
(For HP MDTV's (MD5020, MD5820, MD5880, MD6580) Rev. 03/17/06)

As of this firmware revision, one set of firmware will upgrade all types and sizes of HP MDTV's to run properly.

Be sure to READ ALL the INSTRUCTIONS before attempting to load firmware.

If you are downloading from the HP website, please download the zip files onto your PC, then unzip the files. Load all 15 files onto your USB memory stick (USB stick must be greater than 20mb and equal to or less than 512mb. Memory sticks greater than 512mb may encounter problems since this is a USB 1.0 port).

Upgrading to New Firmware with USB Memory Stick

- Turn TV OFF.
- Remove cableCARD
- Remove all input cables (HDMI, VGA, Component, etc.)
- **Unplug TV AC cord for 10 seconds.** This is done to put the TV into a known state.
- Insert USB stick drive into USB port. **NOTE: USB drive can take up to 20 seconds before it starts loading.**
- **Plug AC cord back in. DO NOT TURN TV ON! Turning TV on during upgrade process will corrupt files in the TV!**

- Firmware loads automatically. This upgrade process is indicated by three LED's on the front panel that flash sequentially from Left to Right. The process will take about 30 minutes. Sometimes the sequential flashing will stop momentarily, but should re-start automatically.

- Firmware loading is completed successfully when center blue LED flashes repeatedly ON and OFF (without any red lights).
- **Do not pull USB drive out of port until the FW loading process has completed. Unplugging USB stick may damage TV!**
- **Note:** If sequential flashing of red-blue-red LED lights continue for more than 60 minutes, REMOVE USB drive and restart process by starting at "Unplug TV AC cord for 10 seconds."

- **Wait 15 seconds.**
- Remove USB drive from TV.
- **Unplug TV AC cord. Wait 10 seconds.**
